

## A SOLUTION BRIEF

# Connecting Workday to the Enterprise for Scalable Automation and AI

## The Challenge

Modern enterprises rely on Workday to run HR and Finance – but critical data and workflows live across dozens of external systems. The result?

- *Disconnected systems:* delays, errors, and manual work
- *Costly Studio integrations:* niche skills, long build times
- *No real-time visibility:* impacts planning, compliance, and performance
- *AI readiness blocked:* lack of orchestration and secure system access

## Why Workato + Workday

Workato is the only Workday partner delivering enterprise-grade integration + automation + AI in a single platform – with native support for Workday REST/SOAP, certified solutions, and low-code accessibility across business and IT teams.

Capability	What it Means
Low-code orchestration	Build secure, scalable automations 5x faster than Studio or custom code
Prebuilt Workday connectors	Connect to Salesforce, ServiceNow, Stripe, Netsuite, Slack, Okta, and 1,600+ more
Enterprise MCP	Enable AI to act with enterprise context – not just answer questions
Built-in governance	Audit trails, RBAC, versioning, monitoring, and rollback baked in

BETTER TOGETHER
